

Open position, September 2012

Klewel is active in the field of webcasting, by providing leading edge solutions for efficiently capturing, archiving and searching the information contained in multimedia digital recordings of presentations and conferences.

To support the development and the needs of our innovative webcasting solution in conjunction with active and future collaboration with Swiss- and European-funded projects, we are looking to strengthen our team located in Martigny with a :

R&D Software Engineer

Job description

You will be part of a small, young, highly skilled software engineering team, and be responsible for prototyping web applications for the success of the projects. This includes not only projects' management on our company's side but also both front-end and back-end implementations. In substance, this means integrating cutting-edge technologies from the different partners and exposing data through a web portal allowing interactivity. In addition, you will be the principal contact person with our partners in the projects.

Responsibilities

- Collaborate with both academic and industry partners. You look forward to communicating regularly with the partners and are keen on traveling abroad for occasional collaborations, meetings, and demos.
- Work with latest methodologies and technologies including confidential or work-in-progress technologies from different partners. You are a tech enthusiast and are wanting to stay up-to-date on the latest web technologies.
- Develop visionary prototypes on top of web frameworks. You will develop a complete web portal, from the back-end to the front-end, integrating external web services from our partners.

Requirements

- Masters degree in computer science or equivalent
- Autonomous and self-organized
- Excellent oral/written English
- Experience with web framework (Django)

Desired Skills

- Interest in recommendation systems
- Experience in technical or scientific writing

Does this sound like a good match? Are you ready to join us and contribute your expertise to our company? If yes, we look forward to receiving your application at jointheteam@klewel.com
